

ELIGROUP[®]
naval service network

ELIGROUP LTD

IS A LEADING COMPANY IN MARINE AUTOMATION, SECURITY
AND SAFETY, AS WELL AS INTEGRATED CONTROL SYSTEMS.

FIELDS OF APPLICATIONS

We have a strong presence in several vertical markets with prestigious references, such as maritime, offshore and onshore oil & gas.

OIL & GAS

The wide range of specialised and certified ex-proof products provides the highest degree of protection and the immediate situational awareness in critical monitoring missions in areas with risk of explosion.

- OIL AND GAS PLATFORMS
- OIL AND GAS TANKERS
- TERMINALS
- DRILLING RIGS
- INDUSTRY PLANTS
- PIPELINES

MARINE ONSHORE OFFSHORE

With the wide range of specialised products for professional video surveillance, **Eligroup** has the global expertise to address the complex issues of maritime and industrial applications. Designed to withstand the most corrosive atmosphere, these AISI316L PTZ cameras and fixed cameras can be installed on board of all types of vessels such as oil tankers, container ships, LNG carriers, etc.

- OFFSHORE
- MARINE
- ONSHORE PERIMETER APPLICATIONS
- ONSHORE INTERNAL APPLICATIONS

PASSENGER VESSELS / COMMERCIAL VESSELS / WORKBOATS

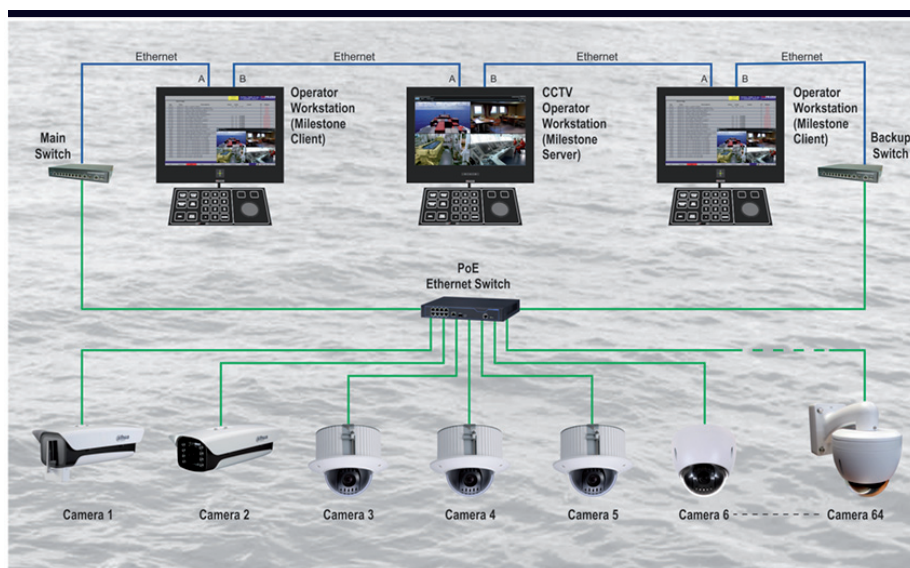

- ENGINE ROOMS
- ANTIPIRACY APPLICATIONS
- TERRORISM THREATS
- EXTERNAL AREAS

We can interface with a wide range of critical marine systems. This includes VSAT equipment, which allows communication with onshore facilities and remote access to live streams, recorded video and camera control.

Other integrations available include:

- RADAR
- ELECTRONIC CHART DISPLAY AND INFORMATION SYSTEM
- FIRE AND GAS
- CARGO MONITORING
- PUBLIC ADDRESS
- ACCESS CONTROL
- INTRUDER ALARM
- CRANE EQUIPMENT
- AUTOMATED IDENTIFICATION SYSTEM (AIS)

KEY VALUES

Five reasons to choose **ELIGROUP**

EXPERIENCE

Our solutions have been installed on land and off-shore RIGs. The experience gained in the field has enabled us to optimise our systems, to guarantee continuous operations in difficult environments and in critical conditions. Our systems are tested to withstand extreme temperatures and the harsh mechanical stresses typical of drilling.

We provide stand-alone and integrated systems which are also explosion proof and vibration proof. Thanks to our systems, we can continually monitor the critical RIG areas to ensure optimal operational and safety performance.

QUICK INSTALLATION

Our solutions have been installed on land and off-shore RIGs. The experience gained in the field has enabled us to optimise our systems, to guarantee continuous operations in difficult environments and in critical conditions. Our systems are tested to withstand extreme temperatures and the harsh mechanical stresses typical of drilling.

We provide stand-alone and integrated systems which are also explosion proof and vibration proof. Thanks to our systems, we can continually monitor the critical RIG areas to ensure optimal operational and safety performance.

RELIABILITY

It is the basic requirement of each part of the drilling RIGs to avoid any downtime. Guided by this priority, our R&D team puts the reliability at the centre of the design process.

We select the best components on the market and we assemble them with our technicians. Thanks to our know-how, we have developed original solutions to equip our cameras with effective vibration proof systems. Each system is submitted to strict performance tests in laboratories before delivery, to guarantee reliability even in extreme conditions. All our components are made in Italy or Europe.

DELIVERY ON TIME

To be on time in terms of delivery is an essential condition in a market in which the return on investment (ROI) is a mark of success. We deliver turnkey systems ready to be used in the installation sites, within the established time frame.

TAILOR MADE

The integrated Eligroup control system is designed to be fit to our clients, to meet their specific surveillance needs. Our systems are compliant with the required legislative and technical standards. Thanks to the user-friendliness of our systems, one single operator in the cabin can view the function of the entire drilling plant and control the cameras through clear and immediate commands.
